SUPERINTENDENT OF SCHOOLS

ARTHUR IRISH

In making this my first report I wish to consider first the

PUPILS

In the early part of the year Stanford Achievement Tests were given to all the pupils above the fourth grade. The results of these tests show that the progress of the children examined has been satisfactory.

Otis Intelligence Tests were given to the High School students and the results tabulated for use.

Now that we are in the New High School Building, room is afforded for expansion in the grades building. There are at present in the Grade building six grades with four teachers. Shall we expect a teacher to do her best work with 45 or 50 pupils with two grades? Shall we not expect some pupils to progress as fast as they are able and are not normal progress children entitled to individual attention? Enrichment of the curriculum with the Home Economics course has helped the needs of many pupils. We may expect sometime that the Manual Arts course will help many boys.

We propose to follow up our boys and girls after they complete their High School work. We shall be interested to know the kind of work they do in other institutions. In case pupils need money to complete their education a loan fund could be established with the

local bank. I think many old time summer residents would be glad to help in the creation of such a loan fund. I am adding a list of students in our present Senior Class with the courses in which they are entered.

TEACHERS

Owing to the resignations of some of the teachers some new instructors have been added in the High School. You no doubt are familiar with the changes. The teachers are taking an interest in their work and we hope that the standing of the school will continue to grow and that it may be entered on the College Entrance Examination Board List before long.

New special teachers of music and Home Economics have been added and for detailed report of their work we refer you to their special reports.

A lot of the teachers are putting in long hours and are anxious for self improvement. Several have invested in costly works of reference on the curriculum. Many take teachers' magazines and read the same. Others take advantage of the Normal staff at Farmington and the State staff at Augusta. In various other ways the teachers seem to be professionally minded.

I hope that a rest room in the New High School can be fitted up so that the women teachers and students can be taken care of.

The salary list compares favorably with that of other towns of the same size.

The Parent Teacher organization has taken an active interest in the teachers and the parents in town have recognized the teachers in different ways. We hope the good feeling between the parents and teachers will continue.

Several teachers have already indicated that they propose to attend summer school this summer. I wish we could recognize this in some way.

REPAIRS

The ventilating system at the Grade building should be repaired in some way. With the wind in the right direction it is not possible to deliver both heat and fresh air. The heating system in the New High School works perfectly, also the ventilating system.

I recommend that a fire glass window be installed opposite where the fire escape delivers pupils at the Grade building.

It would be very nice if we could obtain either by gift or purchase a new flag pole for the New High School.

The water pressure at the New High School should be lowered by the installation of a reducing valve. In this way plenty of fresh water would be available for shower baths.

It would not cost very much to make some tables for those who bring their dinners. The chairs are already available.

It might be advisable to provide additional fixed seats for the second grade. At present they use chairs. However, the children should have plenty of free movement.

I have no doubt that the teachers would be glad to supervise the playground if the present equipment was repaired and added to.

The question of the future disposition of the Quimby school will come up in the annual meeting. This matter was talked about at the last annual meeting.

The P. T. A. at Oquossoc raised about \$20 for electric lights. These have since been installed.

The Memorial clock at the Grade building receives the careful attention of the Janitor. He wonders if it should not be cleaned by an expert.

Fire extinguishers have been provided at the New High School. A reduction in rates was thus obtained.

It would be a fine memorial at Oquossoc if some summer resident should install a Memorial clock at the school building.

It would make a splendid Memorial if some wealthy summer resident would give an indoor swimming pool as an addition to our High School gymnasium.

NEW COURSES

This year the Home Economics course has been started. We think it fills a need. Some additional equipment should be added now that the foods work has been started. I recommend that the food cooked in this department be sold and that the proceeds go toward running the department. Anyone interested in buying cooked food might communicate with the instructor.

Next December the State will contribute to this course about \$678. This will help reduce the cost to the town.

To install a Manual Arts course would cost about as follows: A teacher could be hired for \$1,200. Manual training benches and tools would cost about \$1,000. The expense for lumber would be about \$250 annually. The town would receive a rebate of about \$700 from the State each year.

PARENT TEACHER ASSOCIATION

This year has seen renewed interest in this organization. Some splendid programmes have been given. The meetings occur usually the third Wednesday evening of the month. However, Miss Florence Hale will probably come the first week in April. She is an able speaker and much sought after.

In March the programme will consist of a physical demonstration under auspices of the Principal's wife, Mrs. Tilton.

In May the teachers will entertain and there will be a school exhibition.

We hope that the attendance at these meetings will be even larger than before.

MEDICAL INSPECTION

Just before New Year's the County Health Nurse inspected the children as far as the 6th Grade. The remainder of the work is yet to be done as the County Nurse is now working in Chicago. This work was of a high class. The local nurse, Mrs. Lamb, was also invited to assist with the work but was not able to do so at the time. The County Nurse devoted three days to Rangeley. Five days were devoted to work in the towns adjoining Rangeley.

Parents having children with defects were notified. Children beginning school were found with defective eyesight. A child that cannot see the printing on the blackboard is in bad shape to progress in reading.

A great deal of money, nearly \$200 was raised for Health work by the sale of Xmas seals. I understand that the town gets the benefit of a certain per cent. of this. In addition substantial contributions have been made to the County Health work by interested people.

I understand that a new County Nurse will be on the job about the second week in February. I hope the inspection can be completed at this time.

Health work has accomplished much toward removal of bad tonsils and adenoids. Children's teeth have been fixed. Cases of defective vision have been discovered. Let the good work go on.

A study of the special reports will prove interesting. By reference to the summary you can see that the schools finished the year with a splendid balance. The school board should receive its share of the credit for this. The judgement and interest of the board has been valuable.

The teachers have also shown a very coöperative spirit. All of us bear in mind that our principal job is the better instruction and education of each individual child.

The former Supt., Mr. W. S. Adams, left things in very nice shape and we thank him for that.

The town officers have been very helpful.

Respectfully submitted,

ARTHUR IRISH,

Superintendent of Schools.

Report of Principal of High School

To the Superintending School Committee and Citizens of Rangeley:

I herewith submit my report as Principal of Rangeley High School for the year 1927 and 1928.

The total enrollment for the Fall term was 107 classified as follows:

Seniors	22
Juniors	20
Sophomores	30
Freshmen	35

The enrollment by courses is:

Commercial	25
Classical	27
General	55

The average attendance for the term was 98.6 and the instances of tardiness 33.

Monthly and term examinations are given in all subjects and reports sent to the parents at the end of each month. This enables the parents to keep in close touch with the work of the school.

The school day has been lengthened fifteen minutes and this time used for drill work in Arithmetic, English Grammar, Penmanship and Spelling.

The work of the day is so arranged that the average student has thirty-five minutes at school for preparation of each subject. There are many who should spend more time in study and any whose reports are unsatisfactory should study regularly at home.

The members of the three upper classes are required to compete for places on the public speaking team which is to take part in the interscholastic contest at Strong in May.

One hundred dollars has been paid on a player piano which the school has purchased for use in the gymnasium. Money is being

raised by the school and Parent-Teachers Association for payments on the piano as they come due.

Regular use is made of the gymnasium by the boys and girls. In addition to the school basketball teams, class teams are organized and games are played under the supervision of a coach.

In closing I wish to express my gratitude to the teachers who have coöperated in every way in the management and work of the school.

Respectfully submitted,

E. B. TILTON, *Principal.*

Report of the Supervisor of Music and Drawing

To the Superintendent of Schools and Citizens of Rangeley:

Music in the schools plays an important part in the life of every child. It helps to accomplish many things. It helps increase an appreciation for beauty, it teaches the child to concentrate, it gives a new outlook on life, and above all, it does much to socialize. The music classes have been taught with these points in view.

A brief outline for the year's work follows:

Grades I and II

- Rote songs, scale with syllables
- Dictation of phrases
- Individual work with monotonies

Grade III

- Rote songs
- First presentation of staff notation
- Introduction of books
- Toy orchestra

Grade IV

- Rote songs
- Phrase dictation
- Much sight reading with books
- Explanation of signatures (key and time) and of the simpler time types

Grades V and VI

- Two part singing
- Finish time types
- Start chromatics

Junior High

- Three part singing
- Review of fundamentals including chromatics

High School

- Chorus once a week
- Community singing every morning
- Orchestra once a week. The orchestra this year was made up of three violins, piano and drums.

School drawing should also give the child a keener appreciation for beauty and should help create a new world for him where he sees familiar objects as they really are. All children like to draw. The construction work was much enjoyed, too.

Here is a brief outline of the work:

Grades I and II

Recognition of shapes. Idea of form of the printed letters

Construction work, use of scissors in cut-out work

Grade III

Printing

First use of rulers

Homes of other lands:

Wigwams, Eskimo huts, Mexican huts, etc.

Grade IV

Printing

Further study of shapes of buildings, etc.

Grades V and VI

Printing, designing

Monograms

Book covers

Free hand drawing of nature studies

Junior High

Printing

Perspective drawings

Principles of color

Posters

I wish to express my thanks to the Teachers and Superintendent of Schools for their interest and coöperation during the school year.

Respectfully submitted,

HELEN ELIZABETH DOW,

Supervisor of Music and Drawing.

Report of Home Economics Teacher

To the Supt. of Schools:

I herewith submit the report of the Dept. of Home Economics for the school year, beginning Sept. 12, 1927.

This is a new department in the Rangeley schools. The course is required in the Junior High School, while it is elective for all four years of the Senior High School. Included in this course are such subjects as "Foods and Nutrition," "Clothing," "Textiles," "Home Management," "Home Furnishing," "Home Nursing," and "Handicraft."

In the Junior High School a foundation is laid for the Foods and Clothing work. This is advanced in the High school and other Home Economics subjects studied, both in practice and theory.

We are somewhat handicapped this year by lack of equipment. Our floor is cement and almost impossible to keep clean. This, of course, violates one of our most important Home Economics rules — CLEANLINESS. Then, too, we have no table linen, silver, dishes, or dining chairs, which means that we will get no practical work in table service and etiquette. However, we will study the theory side of these things and hope for more equipment another year.

At present the Freshman and Sophomore classes are working together as one class, and the Junior and Senior classes are also combined as one. This is not as satisfactory as it would be to have each class separately, but is necessary because of a lack of teachers in the High school. The Freshman-Sophomore class has been studying Clothing and Textiles, and will, before the end of the year, have studied Foods and Nutrition and Home Furnishing. The Junior-Senior class will have studied, before the close of the school year, Clothing, Foods and Nutrition, and Handicraft. Next year each class will continue to advance in Foods and Nutrition and Clothing problems and will also study such subjects as Home Management, Home Nursing, Hygiene and Sanitation, and Millinery.

Our enrollment for the year is as follows:

Grade Seven, sixteen pupils.

Grade Eight, eleven pupils.

Freshman class, thirteen students.

Sophomore class, nine students.

Junior class, four students.

Senior class, ten students.

Respectfully submitted,

MARY E. THURLOW.
